

SRI LANKA ALTERNATE ENERGY LEADERSHIP AWARDS 2018 (3rd EDITION)

19TH JULY, 2018
TAJ SAMUDRA, COLOMBO

Everyday, the world produces carbon dioxide that is released to the earth's atmosphere and which will still be there in one hundred years time. This increased content of Carbon Dioxide increases the warmth of our planet and is the main cause of the so called "Global Warming Effect". One answer to global warming is to replace and retrofit current technologies with alternatives that have comparable or better performance, but do not emit carbon dioxide.

Alternative energy refers to energy sources that have no undesired consequences such for example fossil fuels or nuclear energy. Alternative energy sources are renewable and are thought to be "free" energy sources. They all have lower carbon emissions, compared to conventional energy sources. These include Biomass Energy, Wind Energy, Solar Energy, Geothermal Energy, Hydroelectric Energy sources. Combined with the use of recycling, the use of clean alternative energies such as the home use of solar power systems will help ensure man's survival into the 21st century and beyond. By 2050, one-third of the world's energy will need to come from solar, wind, and other renewable resources.

SRI LANKA ALTERNATE ENERGY LEADERSHIP AWARDS 2018 is organized to recognize the Best performances of various Organizations & Institutions from the Alternate Energy Industry. The Awards focuses on best-of-the-best practices based on the strategy, policies, efficiencies, and the future technology challenges and innovations. The Awards will identify and reward the professionals & organizations for their superlative achievements in their respective field.
